

Description

Hand Cleaning Paste is a mild, skin-neutral wood-flour-based cleaning agent containing substances to protect the skin. This product does not contain solvents and the pH has been adjusted to be slightly acid, but is within the range of neutrality for skin – a fact which has been confirmed by numerous dermatological tests. This product is essentially based on materials from renewable resources. Hand Cleaning Paste thoroughly removes even the heaviest contamination such as oils, greases, tar, bitumen and printing inks without excessive stress on the skin.

Properties

- dermatologically tested
- pH-neutral to skin
- good cleaning action
- pleasant feel to the skin
- high capacity
- protects and cares for the skin

Technical data

pH value	5,4 - 5,8
Density	0,8 g/cm ³
Base	wood flour
Color / appearance	beige
Shelf life in original sealed container	24 months

Areas of application

For cleaning dirty hands.

Comment

SKIN COMPATIBILITY

LIQUI MOLY Hand Cleaning Paste has been dermatologically tested, is pH neutral and has been subjected to extensive medical skin tests. Because it is a very high quality product, LIQUI MOLY Hand Cleaning Paste has always proved to be a success. The formulation, which contains a carefully selected combination of surfactants, promotes the removal of contamination in a skin-friendly manner and leaves a pleasant feel to the skin.

LEGAL REQUIREMENTS

LIQUI MOLY Hand Cleaning Paste is subject to the Ordinance on Cosmetics, EC Directive on Cosmetics and the Act on Foodstuffs and Goods

in Daily Use. LIQUI MOLY Hand Cleaning Paste is not subject to the Chemicals Act or the Hazardous Substances Ordinance. An EC safety data sheet is therefore not necessary.

ECOLOGICAL DATA

LIQUI MOLY Hand Cleaning Paste is not subject to the law on environmental compatibility according to the Washing and Cleansing Agents Act. However, the product complies with this law in regard to the required biodegradability for detergent-based materials.

STORAGE

In accordance with the Ordinance on Cosmetics, LIQUI MOLY Hand Cleaning Paste can be stored sealed in its original containers at room temperature for at least 30 months.

OTHER SKIN PROTECTION NOTES

One in three people today suffers from allergies. Skin complaints are the most common form of occupational disease and can lead to an inability to work. The high concentration of harmful substances at the workplace requires special protective measures to be taken. The fat and moisture content of the skin are particularly important during the winter months. At this time of year, the humidity is very low since the cold air is unable to carry as much moisture as warm air. During this time, humans do not produce as much cutaneous fat. Hands easily become too dry and cracked which can be seen as a layer of white on the skin. Where they can easily become unprotected, they must be given special care.

For information on proper care, see our skin protection plan (part no. 6243).

Application

Hand Cleaning Paste is economical to use, cleans down to the pores and leaves a pleasant feel to the skin. Thoroughly rub Hand Cleaning Paste into dry or damp hands until the dirt has been released from the skin. After this, add a little water and wash thoroughly. Thoroughly rinse the hands with plenty of water and dry them as usual.
